SUMMARY

I am a man with huge dreams to achieve success but during the journey, there is a lot of obstacles and I will break every obstacles to reach that success by taking every necessary steps and keep learning.

EXPERIENCES

Senior Web Developer at Mountain Sea Ventures

Jakarta — Feb 2014 - current

Learnt new skills such as Codeigniter, MODX Revolution with Git as the software version control. In this company, all developers are expected to use Linux for better development environment. For better server performance, Nginx is used instead of Apache.

For the first project, I built a microsite for iOS and Android. It was a promotion website inside Mandiri E-Cash which enable visitors to buy Steam PIN (game voucher).

Currently, I am developing a social review website which is accessible via <http://www.weyap.com>. It is currently in Beta launch and we are expecting feedback from visitors. The website is continuously improved with better functionalities and some good features.

Web Developer at PT FunIT Indonesia

Jakarta — Nov 2012 - Nov 2013

Created a soccer prediction gaming website in which, each round, registered users choose a team that will win the match. At the end of each round, a user with the most number of points will get a cash prize.

Created a sports gaming website which involved customers' real money. What they select will determine the outcome of the game, whether they win or lose. The scale of the project was complex as there was a number of calculations inside. As it involved customers' real money, there was no room for even a slight error.

Senior Programmer at PT Content Provider Indonesia

Jakarta — Nov 2010 - Oct 2012

Continued and finished the car advertisement web project which was halfway done. The web was built using ASP .NET and SQL Server. My job was to supervise a junior developer while I, myself assisted in major part of the web.

Learned how to develop a Blackberry application using its provided SDK tool and managed to build a simple but useful directory app, for example, restaurant directory, hospital directory, currency exchange, etc. Some of the data were manually inputted and some were fed by RSS..

Built a company's intranet website for telecommunication tower project's management. It was built in PHP and MySQL.

Created a tiny VB .NET program for managing stock portfolio of my employer.

Senior Programmer at PT Panca Budi Pratama

Jakarta — Mar 2006 - Oct 2010

Maintained the main program of the company which was built in VB .NET and SQL Server. All the sales, purchase, inventories and other core information of the products are accessible via that program and me as the senior programmer handled the users' requirements such as addition of new modules or reports. I had to build complex SQL queries as well to display the data correctly.

Maintained the Human Resources program written in VB 6 and SQL Server which was mainly used in the factories. It contained employee's timetable, payroll, taxes, etc.

Built websites for other company's divisions. One of the portfolios can be accessed via <http://www.chemcopm.com>

Accomplishments

- Within 2 years of working there, I was promoted from Junior to Senior programmer and trusted to be the database person as well.

SIDE JOBS

Professional website development for startup as well as companies which are developing very well.

- gather requirements.
- build from scratch and present some layout alternatives for the clients to choose one.
- web maintenance

EDUCATION

UNIVERSITY OF MELBOURNE

Melbourne, Australia

Bachelor of Computer Science — 1999-2001

TRINITY FOUNDATION STUDIES

Melbourne, Australia — 1998-1999

BEDOK SOUTH SECONDARY SCHOOL

Singapore

GCE O Level Certificate — 1996-1997

SMP KRISTEN YUSUF

Jakarta, Indonesia

Ebtanas — 1993-1995

TECHNICAL SKILLS

- HTML, CSS, Javascript, jQuery, AJAX, JSON
- PHP, MySQL, MongoDB
- Linux Ubuntu 13.10
- Git
- Codeigniter, MODX
- Bootstrap for responsive website
- Adobe Photoshop
- Adobe Dreamweaver
- VB .NET, ASP .NET, SQL Server

SOFT SKILLS

- **Price negotiation for a web development**
 - After obtaining information requirements from the client, the final phase of the project initiation is to negotiate the development fee. Sometimes, it does not run smoothly as clients usually insist on insanely cheaper price.
- **Software / Web presentation**
 - Presenting software / web in front of project owners, gathering requirements and giving solutions to existing problems.
